Do not contaminate food or feed by storage or disposal.

STORAGE: Do not store near heat or open flame. Store in a cool dry area away from children. Temperatures above 120°F may cause bursting.

DISPOSAL: Do not Puncture or Incinerate!

If empty: Place in trash or offer for recycling if available.

VOC COMPLIANT IN ALL STATES.

ECO-Stall™

NATURAL STABLE, BARN & TRAILER
ODOR NEUTRALIZING FOAM

ALL NATURAL FORMULA

- Eliminates Odors from Ammonia, Urine & Uric Acid Build up – Naturally
- Creates a Healthy Stable Environment
- Reduces Barn Maintenance & Labor
- For Horse, Goat, Sheep & Kennel areas

DIRECTIONS FOR USE

Shake well before using and periodically between sprays for best results. Remove cap and invert can to apply. Can sprays only when facing downward. Lightly mist wet spots with **ECO-Stall**, covering the spot with foam. Only a thin layer of foam is required. Treating wet spots will dramatically reduce ammonia build up and odors in barns. Remove solids as necessary. Use **ECO-Stall** to treat manure soil spots as well to further control odors and odor build up in barns and trailers.

ECO-Stall will control odors caused by ammonia, urea and uric acid build up around horses, goats, sheep, swine, poultry, kennels, cat litter boxes as well as in hamster cages and rabbit hutches.

ECO-Stall is safe to use indoors and outdoors.

ECO-Stall—STABLE, BARN & TRAILER ODOR NEUTRALIZING FOAM utilizes nature's bioremediation process by augmenting the bacteria naturally present in animal waste with nutrients that then attack the waste product and convert it into harmless carbon dioxide and water. Lightly scented **ECO-Stall** will reduce odors, extend the use life of stall bedding and rubber stall pads, reduce the frequency of stall & trailer cleanings and provide a healthier environment for your horse and pets.
